ANDROID ASSETS GENERATOR USER MANUAL

DESCRIPTION

Android Assets Generator is a great tool that saves you a lot of time. If you are android developer or UI designer and faces a difficulty to create high quality icons that follows **Android Icons Design Guidelines** rules, so welcome aboard, you've finally reached the final solution to generate all your icons at once, with only few clicks.

Android Assets Generator helps you to automatically resize and save your files with no fear about the full/content sizes for each icon section or the different resolutions the android requires (XXHDPI, XHDPI, HDPI, MDPI, LDPI)

Design your icon in one of Android Assets Generator Templates then apply the corresponding action. You'll have your icon generated in all resolutions and in the right dimensions regarding the full/content size.
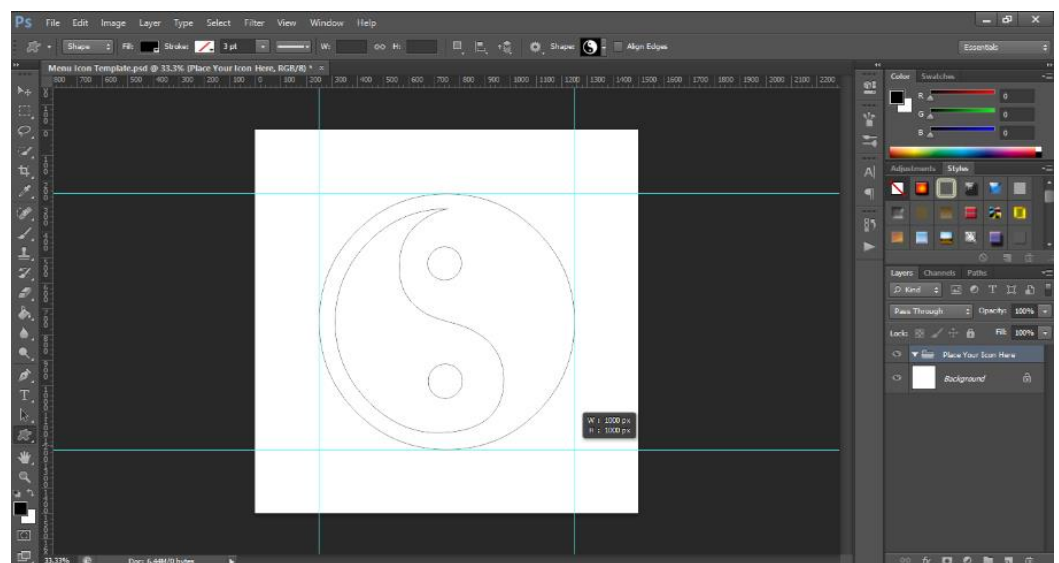

INCLUDES

- **1 X .ATN file**
  with 7 different actions for each Icon template
  1- Launcher
  2- Menu
  3- Action Bar
  4- Status Bar and Notification
  5- Tab
  6- Pop-up Dialog and List View
  7- Small and Contextual

- **7 X .PSD file**
  Each PSD contains a template that helps you to create your icon perfectly in the right resolutions and dimensions

HOW TO

1- Choose the right template for your icon

Action Bar Icon Template.psd   Launcher Icon Template.psd   Menu Icon Template.psd   Pop-up Dialog and List View Template.psd   Small and Contextual Template.psd   Status Bar and Notification Template.psd   Tab Bar Icon Template.psd
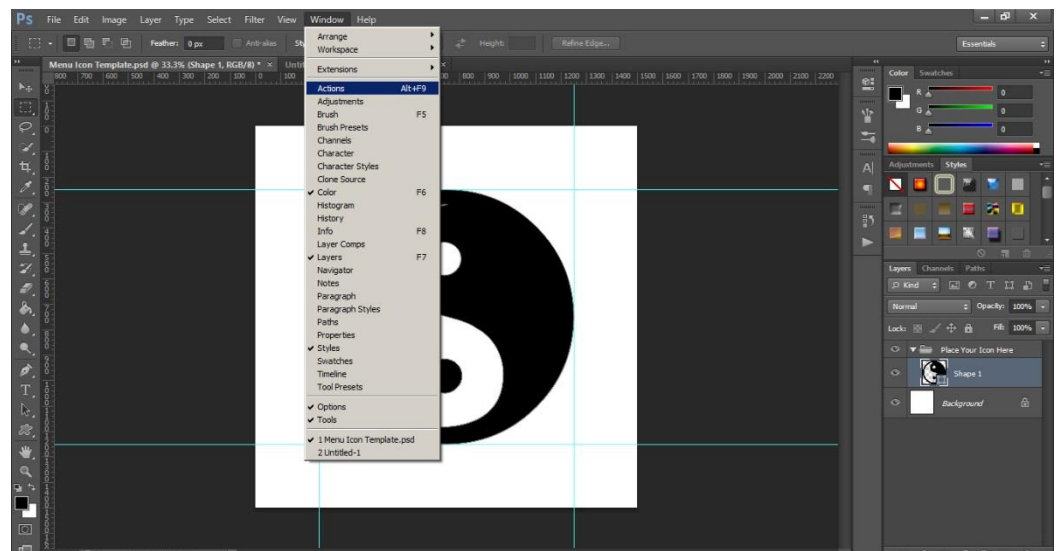

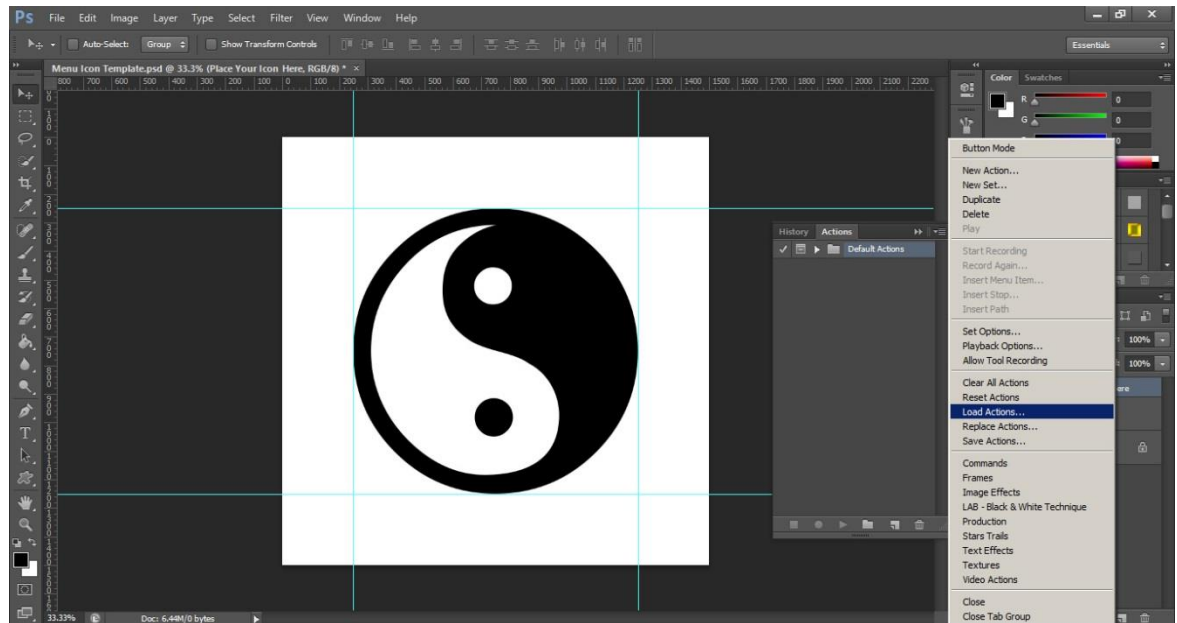

2- Place your design inside the guides of the previously selected template, you can insert your design as (Shape, Vector Object…)

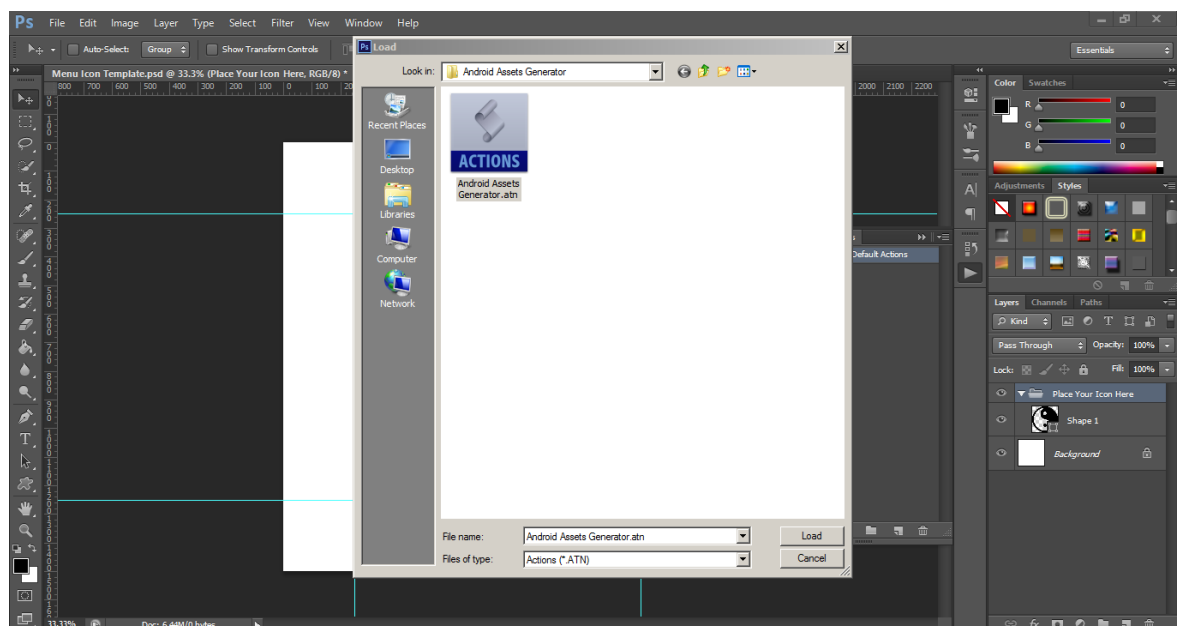

3- Open your actions window from Windows menu then choose actions or simply press Alt+F9 or you can click on play icon in the right hand side
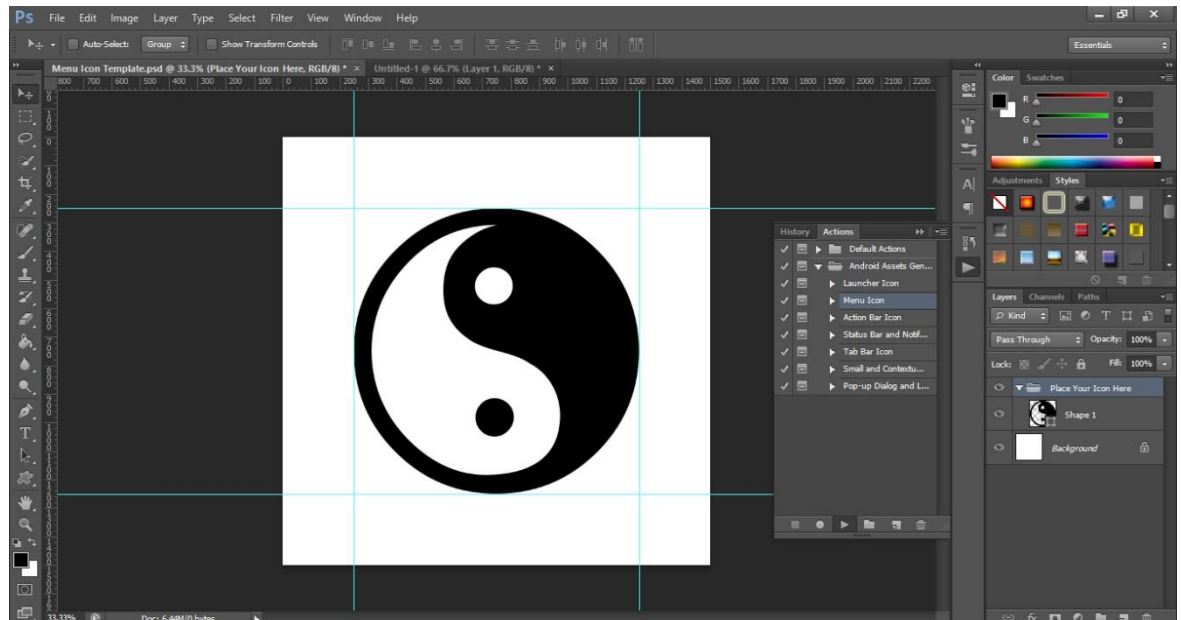

**4-** Click on the down arrow in the right top of the actions window then select Load Actions.

5- Head to the place where you placed your download then select the .ATN file then click load

Android Assets Generator User Manual

6- Select from the Actions list the corresponding action for your previously selected template, here in the demo I did select Menu Icon Template and I did create the design for the Menu Icon Template. Now I'm going to save the appropriate resolution and dimensions for the menu Icon. Select Menu Icon from the action list and then click play.

7- You will be asked to write down the file name to be saved and where you'd like to save them. Please note that the actions create the largest scale icon first, which means XXHDPI (if existed), XHDPI, HDPI, MDPI, and LDPI. So please consider naming your file in this order

Please don't forget to rate my item if you like it :)
